Detailed Action

Claim Objections

1. Claim 9 is objected to because of the following informalities: It appears that the word "defect" is a typo error and should be changed to -- detect --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 9-12, 14, 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi et al. (USPN. 6,247,548 B1).

Hayashi discloses a motor driven vehicle comprising:

a. an electric motor that drives wheels through a power source; and

b. an electric motor control unit that drives the electric motor; wherein when a voltage of the power source is a predetermined value or greater, the electric motor control unit controls the electric motor such that rotational speed-torque characteristics that the electric motor has are maintained when the voltage of the power source is at the predetermined value (e.g. rotational speed-torque is directly related to the power source and that a power source such as a battery is always at a predetermine value).

With regard to claims 3, 9-11, 14, and 19-20 Hayashi discloses all of the claimed limitations.

Allowable Subject Matter

3. Claims 2, 4, 6-8, 13, and 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 5 is allowed.
